

MILKANA[®]

SUPERIOR

MILK ANALYZER

... the next generation

An innovative, cost effective, practical answer to the needs of the Dairy Industry from the farm to the laboratory:

- Multi-Parameter
 - Fatness
 - Solid Non Fat
 - Density
 - Added Water
 - Freezing Value
 - Protein
- Portable
- User-friendly protocol
- Cost effective; requires no costly caustic chemicals
- Versatile (Cow, Sheep and/or Buffalo Milk)
- Automated data collection RS 232 communication
- 12V power cable for car use

Measured in
less than 90 seconds

Stainless steel body for longer life

In response to the growing needs of the dairy industry to integrate field collection testing with laboratory analysis, the Milkana provides, fast, accurate and cost-effective results.

Based upon ultra-sound technology, the instrument does not require any costly reagents. Fatness, solids not fat and protein analyses are completed simultaneously in less than 90 seconds!

- Surprisingly affordable, efficient way to test for critical components of milk.
- Portable, light-weight design for field testing with battery-power or standard power for laboratory usage.
- User friendly, push-button, walk-away protocol.
- Simple calibration and measuring adjustment completed by operator.
- Automated cleaning.
